

AIAI Annual Meeting 2010 in Tokyo

Author_Dr Tomohiro Ezaki

The Annual Meeting of AIAI was performed in Tokyo/Japan from November 6–7. Total number of participants was around 500 people.

On November 6, Authority and Clinical Examination for dentist; 32 people took Exam, Implant authorization Hygienist; 4 people took Exam, Implant authorization technician; 1 person took Exam, Implant Coordinator; 8 people took Exam, were performed. Clinical, Implant authorization Hygienist, Implant authorization technician were done by written examination. Authority was by written and oral examination.

On November 7, it was scientific part all day and number of lectures about studies and case reports of implantology were performed four different rooms.

Before starting the lectures in the morning, the President of AIAI, Dr Naotaka Sugiyama, announced a lot of information and activities the association had this year. He also talked about the participation of the board members of AIAI at the DGZI Congress in Berlin/Germany last October. AIAI and DGZI confirmed the partnership for information exchange of scientific part and technical information in implantology for today and the future.

AIAI's President promoted to the audience to participate in DGZI Congress 2011 in Cologne/Germany.

Many friends and colleagues of AIAI will take part, too because it will be possible to have Japanese simultaneous interpretation for the lectures. In addition, he called to the AIAI-members which are having authority or a clinical certificate of AIAI in Japan, to become Expert and Specialist of DGZI. In Germany and in Japan it is so venerable to hold such a certificate of DGZI.

The AIAI Annual Meeting 2010 was opened under the main topic "Implant treatment to connect tomorrow". The Sinus Symposium was held as one of the topics for this meeting in the morning on November 7th. AIAI called five lecturers for this symposium: four top-level Japanese clinicians and one from Korea—with high technical points of sinus lift operation and studies. They presented their superior clinical cases besides failure cases which were so intelligibly.

The contents of those lectures had a key to lead us to a successful operation and a final implant stage. They also gave us the latest technology and knowledge of implantology relative to the sinus floor elevation. A few lectures for hygienists and dental technicians were held in the other rooms.

Meeting participants gave us a pat on the back at the social gathering party. We also had powerful confidences from good answers of the questionnaire of this meeting. This successful meeting contributed to our goals and we look forward to the future of the AIAI. We were so happy that a lot of people were pleased with us in this society and we learned many things from the lectures in this meeting. Some of the lecturers told us to try to present their knowledge and technology of sinus lift or implantation at the DGZI Congress in Germany.
